It describes the main aspects of the thinking process with the view of giving the teacher a clear idea of the fundamental things to aim at in getting the child to think. Certain features perhaps call for a word of explanation. I have endeavoured to begin at the standpoint of the person who is ignorant of Logic, and to familiarise him with the thinking process before proceeding to analyse it. In so doing, I have had in view the method of teaching by which the student is led to construct his own science by his own efforts, in discussion with the teacher. It follows that the exercises form an integral part of the text. They deal as far as possible with problems which arise in school work. They are intended, of course, to test the student's knowledge; but their main purpose is to suggest topics for discussion between the teacher and his pupils. Hence...

### Reviews

*This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.*
