Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from *Compressed Air: A Treatise on the Production, Transmission and Use of Compressed Air* In preparing a second edition of this book, its character as an elementary treatise on the principles of Compressed Air has been maintained throughout. To bring the subject up-to-date, however, the greater portion of the chapter on Transmission has been re-written. Modern formulas were introduced with examples of their application. The important effect of altitude differences on Compressed Air installations has been illustrated by reference to new equations in Article 4 and by the example under Article 97. A new Table VIII, containing the principal Compressed Air formulas was substituted for the old table that has become superfluous. The obsolete Hurricane valve in Article 147 has been replaced by a description of the modern Ingersoll-Rogler valve. Altogether, a general revision of the original text and the addition of new material brings the second edition of the book abreast of modern theory and practice. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
