Excerpt: .(digital pressure), by pads and bandages and other appliances, such as tourniquets. Its object is to obliterate or diminish the calibre of the bleeding vessels, to favour contraction of their cut ends, and promote coagulation. (3) Free eirculation towards the hcart.--With the view of favouring the flow of blood in the veins, and securing free circulation towards the heart, all constricting articles of clothing, such as collars, corsets, belts, garters, etc., should be loosened. (4) The employment of st/ptics.--Styptics are substances which have the power of stopping bleeding by producing a species of artificial coagulation of the blood. Cobwebs are a most effective styptic. So also is perchloride of iron, a saturated solution of which in glycerine, is a valuable and handy styptic for domestic use. It should be applied by means of a fold of lint wrung out of the solution and firmly...
