

The Case Against Darwin Why the Evidence Should Be Examined

By James Perloff

Refuge Books. Paperback. Book Condition: New. Paperback. 83 pages. Dimensions: 8.3in. x 5.5in. x 0.3in. The Case Against Darwin is James Perloff's newest title on the creation-evolution debate. Written from a creationist perspective, this 83-page book is a primer for those unfamiliar with the subject, and too busy for a full-length book such as the author's earlier Tornado in a Junkyard. Perloff first explores the social impact of Darwinism to establish the relevance of the topic. Then, in layman's language, he discusses the growing body of evidence that is invalidating Darwin's theory of evolution: evidence from genetics, origins science, biochemistry, paleontology, taxonomy and molecular biology. Finally, he examines fallacies of certain evidences commonly said to support Darwin's theory: Ernst Haeckel's embryo drawings, vestigial organs, salt percentages in blood and seawater, babies born with monkey tails, peppered moths, microevolution, and similarity as a proof of common descent. Despite the scientific nature of the material, Perloff keeps it light and short, and most readers should find The Case Against Darwin an easy read. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
